Shampoos

S/1 Is a low lather highly sophisticated shampoo made with Lemon oil.

The natural antiseptics make it an ideal shampoo for babies with cradle cap.

This shampoo does NOT contain chemical foaming agents and is a pure shampoo which cleanses the hair and gives it shine and body.

S/2 is a specially formulated for greasy hair and scalp. It is expertly blended with orange oil which does not strip the hair like other shampoos but leaves the hair fresh and vibrant.

S/3 Is our best selling shampoo and is for dandruff, psoriasis, eczema, and all scalp conditions. It is highly recommended in the foamer format as it may be used as a body wash particularly when there is a skin condition such as psoriasis.

Foamer 1 This is the same as S/1 but is more economical to use as you pump out the desired amount of shampoo thus eliminating any waste.

Foamer 2 This excellent shampoo is the same as S/2 but is in the foamer for ease of use.

Foamer 3 This shampoo has received a high accolade as an anti dandruff shampoo. Used in the foamer, means that you can put the shampoo where you want it on the body or hair. This shampoo is renowned for the prevention of head lice.

Conditioners

Conditioner No 1 is a smooth creamy liquid which has been blended with Jasmine oil to give the hair a smooth shiny texture.

Conditioner No 2 is a white silky liquid which has specially been formulated for greasy hair. It is the perfect partner for shampoo No 2.

Conditioner No 3 is a fantastic conditioner. Its smooth green colour is a blend of all those herbs which make it the perfect conditioner to use after shampoo No 3

TN25

The ultimate hair loss pack is the power house behind the treatment. It is recommended that your client takes 2 capsules a day, one in the morning with his/her breakfast and one capsule with his/her dinner. The capsules are manufactured to a very high specification and contain special plant enzymes which work in sync with the probiotics and essential vitamins and minerals' ensuring the client gets the right amount of nutrition daily. Because of this synergy it is important not to take the capsules with a hot drink.

Scalp Stimulator

This essential lotion is applied to the scalp after shampooing. The best use of it is to apply the lotion to the scalp with cotton wool then activate the lotion with cold water for roughly 5 seconds. This cools the head right down. Then you massage the scalp for about 10 seconds then reapply cold water and repeat the process. Do this 4 times before applying the Eucaderm Conditioner.

This works very well in creating a vaso dilation (an increase of blood) to the scalp.
